

# Wildflowers by Dolly Parton

## [Intro]

G G C G G D7 G G

## [Verse 1]

          G                                  C                  G  
The hills were alive with wild flowers and I  
          G                  D7                  G  
Was as wild, even wilder than they  
          G                                  C                  G  
For at least I could run, they just died in the sun  
          G                  D7                  G  
And I refused to just wither in place

## [Chorus]

          C                                  G  
Just a wild mountain rose needing freedoms to grow  
          C                                  G          D7  
So I ran fearing not where I'd go-o-o  
          G                                  C                  G  
When a flower grows wild it can always survive  
          G                  D7                  G  
Wildflowers don't care where they grow

## [Verse 2]

          G                                  C                  G  
And the flowers I knew in the fields where I grew  
          G                  D7                  G  
Were content to be lost in the crowd  
          G                                  C                  G  
They were common and close, I had no room for growth  
          G                  D7                  G  
And I wanted so much to branch out

## [Chorus]

          C                                  G  
So I uprooted myself from my home ground and left  
          C                                  G          D7  
Took my dreams and I took to the roa-oa-oa  
          G                                  C                  G  
When a flower grows wild it can always survive  
          G                  D7                  G  
Wildflowers don't care where they grow

## [Verse 3]

G                                  C                  G  
I grew up fast and wild and I never felt right  
          G                  D7                  G  
In a garden so different from me  
          G                                  C                  G  
I just never belonged, I just longed to be gone  
          G                  D7                  G  
So the garden one day set me free

[Chorus]

                  C                                          G  
I hitched a ride with the wind and since he was my friend  
          C                                  G          D7  
I just let him decide where we'd go-o-o  
          G                                  C                  G  
When a flower grows wild it can always survive  
          G                  D7                  G  
Wildflowers don't care where they grow

          C                                  G  
Just a wild rambling rose seeking mysteries untold  
          C                                  G          D7  
No regrets for the path that I cho-o-ose  
          G                                  C                  G  
When a flower grows wild it can always survive  
          G                  D7                  G  
Wildflowers don't care where they grow
